QUESTION 1

Which of the following is an advantage of using the Virtual DOM?

A. Rendering the virtual DOM is faster than rendering the regular browser DOM.

B. The virtual DOM updates each element when the layout of the DOM changes, meaning that the page always reflects the most current data from the server

C. The Virtual DOM is not just a view layer, but also makes changes directly to the Web page

D. You can learn virtual DOM concepts and React libraries quickly because the libraries are simple and concise

Correct Answer: C

QUESTION 2

Which of the following is a true statement regarding the relationship between Promises and callback functions?

A. A Promise cannot be used in conjunction with a callback.

B. A Promise is used to monitor the value of a variable A callback retrieves the previous value of a variable.

C. A Promise is a returned object to which the developer can attach callbacks instead of passing callbacks to a function.

D. A Promise is an object a developer can use to pass callbacks to functions.

Correct Answer: C

QUESTION 3

Kirken needs to write a script to construct custom objects that store user account information such as a username. password and e-mail address for a Web site. What should he add to the following code to set these properties?

```
function accountObj(username, password, emailAddress){
/* code goes here */
}
```

○ A.
```
    objUsername = this.username;
    objPassword = this.password;
    objEmailAddress = this.emailAddress;
```

○ B.
```
    username = objUsername;
    password = objPassword;
    emailAddress = objEmailAddress;
```

○ C.
```
    objUsername = username;
    objPassword = password;
    objEmailAddress = emailAddress;
```
