QUESTION 1

Scenario: External users need access to hosted desktops and applications. A Citrix Administrator is

instructed to configure access to hosted resources through NetScaler Gateway.

The administrator should configure settings on the NetScaler Gateway in order to allow

users to access the corporate desktop and application store through NetScaler Gateway.

A. SOAPService

B. Citrix XML Service

C. Citrix Wallet Service

D. Secure Ticket Authority

Correct Answer: A

QUESTION 2

A Citrix Administrator needs to configure a production website to show a custom message when the virtual

server is in a down state.

Which NetScaler function or feature should the administrator use in order to meet this requirement?

A. Rewrite

B. Redirect URL

C. Content Switching

D. Spillover Backup Action

Correct Answer: B

QUESTION 3

Scenario: Two NetScaler Gateway virtual servers are configured on a NetScaler appliance. Each NetScaler Gateway virtual server is used to enable secure remote access to dedicated XenDesktop sites for separate divisions: Division A: NetScaler Gateway: NG-A XenDesktop Controller: DDC-A Division B: NetScaler Gateway: NG-B XenDesktop Controller: DDC-B Each XenDesktop site is placed in its own Active Directory. Firewalls prevent any communication between the divisions.

An administrator should configure the Secure Ticket Authority on the NetScaler for Division B, without causing any configuration issues for NG-A, by binding . (Choose the correct option to complete the sentence.)

A. DDC-B to NG-A

B. DDC-B to NG-B

C. DDC-B to NG-A and DDC-A

D. DDC-A and DDC-B to a load-balancing virtual server

Correct Answer: B

QUESTION 4

Which three parameters are required to create a new cluster instance? (Choose three.)

A. IP address

B. Instance ID

C. Subnet mask

D. Subnet IP address

E. Backplane interface

Correct Answer: ABE

QUESTION 5

Which two components must a Citrix Administrator configure before GSLB can be configured? (Choose two.)

A. An authoritative DNS

B. A link load balancing method
