QUESTION 1

Which two things occur after adding a Subnet IP (SNIP) to a NetScaler which already has a Mapped IP (MIP)? (Choose two.)

- A. The NetScaler IP (NSIP) is no longer required.
- B. A SNIP will be used in preference to a MIP.
- C. Adding a SNIP adds an entry to the routing table.
- D. Client machines can use the MIP instead of the virtual IP (vIP).

Correct Answer: BC

QUESTION 2

Scenario: NetScaler Gateway is implemented to provide Web Resources, including Outlook Web Access and an SAP portal, to users. Marketing and Sales department employees normally work from outside the office location and should be able to access Web Resources from different types of devices that are NOT maintained by the company. Which user access connection method should an administrator configure to meet the needs of this scenario?

- A. Citrix Receiver
- B. PN Agent plug-in
- C. Clientless access
- D. Access Gateway plug-in

Correct Answer: C

QUESTION 3

Scenario: A Citrix Administrator has configured access to a StoreFront store through the NetScaler Gateway: `http:jjFQDNjCitrixjstoreweb` When users attempt to access resources using the URL of the gateway, a 404 error is displayed. What could be causing the error?

- A. The URL is case-sensitive.
- B. The session policy is missing.
- C. The website needs to use HTTPS protocol.
- D. The IP address is needed instead of FQDN in the URL.

Correct Answer: A

QUESTION 4

A penetration test has been performed against the NetScaler Gateway virtual IPs (vIPs) resulting in the SSL RC4-based ciphers being flagged.

What should the administrator do to address the vulnerability?

- A. Remove all the SSL ciphers from the virtual server.
- B. Assign Cipher Group '\\ALL\\' to the NetScaler virtual server.
- C. Assign Cipher Group '\\HIGH\\' to the NetScaler virtual server.
- D. Assign Cipher Group '\\DEFAULT\\' to the NetScaler virtual server.

Correct Answer: C

QUESTION 5

Which two commands, when run at the command-line interface by a Citrix Administrator, can display interfaces configured for high availability monitoring? (Choose two.)

- A. show node
- B. show status
- C. show monitor
- D. showinterface
- E. show hardware

Correct Answer: AD
