### QUESTION 1

Which command should a Citrix Administrator run at the command-line interface to display the NetScaler certificate days to expiration?

- A. show certFile
- B. show ssl stats
- C. show ssl certKey
- D. show certParams

Correct Answer: C

---

### QUESTION 2

Scenario: A Citrix Administrator is implementing a NetScaler appliance for the first time. All clients will connect from a public network and all servers will reside on a private network.

Which deployment mode should the administrator use to implement the NetScaler?

- A. Layer 2 (L2) mode
- B. Layer 3 (L3) mode
- C. Two-arm deployment mode
- D. MAC-based forwarding mode

Correct Answer: C

---

### QUESTION 3

Scenario: An organization currently has three different web servers for accessing Japanese, French and English language webpages, and management has requested that a single URL be used instead. This site

also needs to meet these requirements:

Users should access one web page and URL for all languages.

One IP address should be used for all client connections.

Users should be automatically sent to the correct language-specific web content.

What should the Citrix Administrator configure on the NetScaler to accomplish all requirements?

- A. Content switching virtual server.
- B. Policy-based routing to send users to the correct resources.

- C. Content Filtering with language-based policies to detect each language.
- D. A Responder policy with Inon-addressable load balancers to conserve IPs.

Correct Answer: A

---

#### QUESTION 4

An administrator plans to use only Citrix Receiver for XenDesktop remote access through a NetScaler Gateway device.

Which type of policy should the administrator configure to meet this requirement?

- A. Session
- B. Authentication
- C. Clientless access
- D. Pre-authentication

Correct Answer: A

---

#### QUESTION 5

Scenario: A Citrix Administrator has configured access to a StoreFront store through the NetScaler Gateway: `http:jjjFQDNjCitrixjstoreweb` When users attempt to access resources using the URL of the gateway, a 404 error is displayed. What could be causing the error?

- A. The URL is case-sensitive.
- B. The session policy is missing.
- C. The website needs to use HTTPS protocol.
- D. The IP address is needed instead of FQDN in the URL.

Correct Answer: A

---
