### QUESTION 1

Which information is required to license a NetScaler vPX 1000?

- A. NSIP
- B. MAC address
- C. NetScaler host name
- D. Citrix License Server host name

Correct Answer: B

---

### QUESTION 2

An administrator notices that a NetScaler high availability (HA) pair has changed the primary node several times in the past few days due to intermittent issues.

What could the administrator configure to ensure that HA failures are alerted?

- A. SNMP
- B. Syslog
- C. Route Monitors
- D. Failover Interface Set

Correct Answer: A

---

### QUESTION 3

Scenario: A Citrix Administrator created a new NetScaler Gateway virtual server. During testing, users are unable to access XenApp applications through iOS and Android devices.

Which configuration should the administrator verify?

- A. Clientless Access is set to OFF.
- B. Client Cleanup prompt is selected.
- C. The virtual server is set to Basic Mode.
- D. Single Sign-on to Web Applications is selected.

Correct Answer: A

---

**QUESTION 4**

Scenario: NetScaler Gateway is implemented to provide Web Resources, including Outlook Web Access and an SAP portal, to users. Marketing and Sales department employees normally work from outside the office location and should be able to access Web Resources from different types of devices that are NOT maintained by the company. Which user access connection method should an administrator configure to meet the needs of this scenario?

- A. Citrix Receiver
- B. PN Agent plug-in
- C. Clientless access
- D. Access Gateway plug-in

Correct Answer: C

---

**QUESTION 5**

Scenario: A Citrix Administrator is in the process of implementing StoreFront with NetScaler Gateway. Users in the environment will access resources through Citrix Receiver only.

What does the administrator need to configure on the NetScaler Gateway to enable access through Citrix Receiver only?

- A. ICA Proxy
- B. A Traffic Policy
- C. Endpoint Scans
- D. An AppFlow Policy

Correct Answer: A
