QUESTION 1

Which product offering enables you to collaboratively plan and deliver projects by leveraging intuitive and integrated scheduling tools?

- A. Resource Management
- B. Project Control
- C. Project Management
- D. Project Costing

Correct Answer: C

Project Management is the product offering that enables you to collaboratively plan and deliver projects by leveraging intuitive and integrated scheduling tools. Project Management allows you to create and manage project plans, tasks, deliverables, issues, milestones, gates, etc. using various methods and sources. You can also monitor and control project progress and performance using dashboards and reports. Resource Management is the product offering that enables you to optimize the utilization and allocation of resources for projects and tasks. Resource Management allows you to create and manage resource requests, assignments, pools, calendars, etc. using various criteria and sources. You can also monitor and analyze resource availability and demand using dashboards and reports. Project Control is the product offering that enables you to simplify the planning, budgeting, and forecasting capabilities for projects and tasks. Project Control allows you to create and manage project budgets, forecasts, financial plans, etc. using various methods and sources. You can also monitor and control project costs and variances using dashboards and reports. Project Costing is the product offering that enables you to capture and process project costs from various sources and applications. Project Costing allows you to create and manage project transactions, expenditures, assets, etc. using various rules and options. You can also generate project costing and accounting entries using dashboards and reports. QUESTION 2

Your organization has a requirement to retrieve the value of the cost center segment based on the department.

Which source can you use while defining the account rule to achieve this requirement?

- A. Project Organization Cost Center Segment
- B. Expenditure Business Unit Cost Center Segment
- C. Event Organization Cost Center Segment
- D. Expenditure Organization Cost Center Segment

Correct Answer: D

The source that can be used while defining the account rule to achieve this requirement is Expenditure Organization Cost Center Segment. This source allows you to retrieve the value of the cost center segment based on the expenditure organization of the transaction. The expenditure organization is an attribute of a transaction that represents the organization that incurs or owns the cost of the transaction.

QUESTION 3

Identify the three contract attributes from Project Performance Data that are used in Project Performance dashboard regions. (Choose three.)

- A. Expenditure Type
- B. Projects
- C. Contract Line
- D. Contract Header
- E. Task

Correct Answer: BCE

QUESTION 4

Your administrator creates maintenance conditions on the Maintain Project Enterprise Labor Resources page. An HCM person is included in a condition with a process order value of 1 and, additionally, there are three other conditions, all with a process order value of 10. Identify two correct statements about the Maintain Project Enterprise Labor Resources process as it relates to process order values. (Choose two.)

- A. The process creates a resource by using the conditions with a process order value of 10 but does not create more than one resource for the same person even if subsequent conditions apply to the person.
- B. For the three conditions that have the same process order value of 10, the records are processed in ascending alphabetic order based on the condition name.
- C. For the three conditions that have the same process order value of 10, the records are processed in ascending numeric order based on the condition name.
- D. The process creates a resource by using the condition with a process order value of 1 but does not create more than one resource for the same person even if subsequent conditions apply to the person.

Correct Answer: BD

Topic-FAQs for Define Project Enterprise Labor Resources

What's the processing order of project enterprise labor resource maintenance conditions?

Records are processed by the Maintain Project Enterprise Labor Resources process in ascending order based on the process order value that you specify on the Create Condition page. For example, assume that an HCM person is included in a condition with a process order value of 1. If a resource doesn't already exist for that person, then the process creates a resource for the condition with the process order value of 1. The process doesn't create more than one resource for the same person even if subsequent conditions apply to the person.

If multiple conditions have the same process order value, then records are processed in ascending alphabetic order based on the condition name.

QUESTION 5

You have four resources in your organization: P, Q, R, and S.

Resource P -Project or resource calendar is active.

Resource Q -Project resource request dates are within the project or resource calendar effective dates.

Resource R -Resource calendar is complex, it does not contain seven days, and it contains more than one pattern and shift.

Resource S -Number of working days within the requested date range is not zero on the project or resource calendar.

Identify the resource for whom Resource Availability Capacity Score will not be calculated. (Choose the best answer.)

- A. P
- B. Q
- C. R
- D. S

Correct Answer: C
