QUESTION 1

Which three features are part of Oracle Fusion Functional Setup Manager?

A. feature opt-in for a best fit configuration

B. export and import services for setup data migration between environments

C. guided task list for end-to-end setup requirements

D. updating an implementation project task list by changing the opt-in configuration to suit the latest requirements

E. modifying an existing implementation project task list by selecting more functional areas when needed

Correct Answer: ABC

https://docs.oracle.com/en/cloud/saas/applications-common/r13-update17d/oafsm/applications-cloud-using-functional-setup-manager.pdf Functional Setup Manager offers the following: Standardized application configuration and setup experience Feature opt-in for a best fit configuration Flexible processes for managing setup: Setup by functional areas for an adopt-as-you-go approach Implementation projects to manage setup Upload file to enter setup data in bulk Guided task list for end-to-end setup requirements Export and import services for setup data migration between environments Comprehensive reporting on setup data

QUESTION 2

As you go through the first-quarter close for your customer, you notice that the burden amounts calculated do not seem to be right. Based on the calculations, you notice that the amounts calculated are not considering the burden schedule override at a task level, which was done during the second month of the quarter.

What is the reason for this problem?

A. Only new expenditure items charged to the task use the new burden schedule; expenditure items processed earlier cannot be reprocessed.

B. Only new expenditure items charged to the task use the new burden schedule; expenditure items processed earlier can be manually marked for reprocessing.

C. You can enable automatic reprocessing of expenditure items processed before the burden schedule change.

D. All expenditure items charged to the task use the new burden schedule.

Correct Answer: B

QUESTION 4

Which two privileges are assigned to the Project Plan Management duty in Security Reference Implementation? (Choose two.)

A. Manage Project Plan Resource Assignment

B. Transfer Project

C. View Project Progress

D. Allocate Project Expense

Correct Answer: AC

Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapjm/index.html#_Toc468200732_1_12 Topic ?Privileges-This table lists privileges granted to duties of the abstract role Project Management Duty. Granted Role-Project Plan Management Privilege ?only A and C are listed

---

QUESTION 5

You have defined two expenditure types but they are not available for selection when you enter an expenditure batch.

What is the reason for this problem?

A. The two expenditure types are not assigned to the reference data set that is assigned to the project expenditure organization in which the transaction is performed.

B. The two expenditure types are not assigned to the reference data set that is assigned to the project unit in which the transaction is performed.

C. The two expenditure types are not assigned to the reference data set that is assigned to the business unit in which the transaction is performed.

D. The two expenditure types are not assigned to the reference data set that is assigned to the project-owning organization in which the transaction is performed.

Correct Answer: B

The reason for this problem is that the two expenditure types are not assigned to the reference data set that is assigned to the project unit in which the transaction is performed. Expenditure types are a type of reference data that can be

shared across different business units or organizations using reference data sets. To make an expenditure type available for selection when you enter an expenditure batch, you need to assign it to the reference data set that is assigned to the project unit of the transaction. The project unit determines the reference data set for expenditure types. The reference data sets that are assigned to the project expenditure organization, the business unit, or the project-owning organization do not determine the reference data set for expenditure types. These reference data sets may determine other types of reference data such as expenditure categories, expenditure item dates, etc. Reference: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-costs.html#OAPFM2356231
