QUESTION 1

While opening an organization tree on the Manage Organization Trees page, you notice that the hierarchy status is displayed as Inactive. Identify the two reasons for the organization tree to be in Inactive status. (Choose two.)

- A. You used Create Tree in the action menu.
- B. You used Create Tree Version in the action menu.
- C. You used View Tree Version in the action menu.
- D. You selected the Edit icon for opening the hierarchy.
- E. You opened the hierarchy by clicking the name.

Correct Answer: AB

When you use Create Tree or Create Tree Version in the action menu, you create a new organization tree or a new version of an existing tree, respectively. These actions result in an Inactive status for the organization tree, until you activate it. When you use View Tree Version or select the Edit icon or click the name of the tree, you open an existing organization tree that has an Active status. QUESTION 2

You have been hired as a project manager for implementing the Project Financial Management and Project Execution Management offering by an organization. The Chief Information Officer of the deploying organization has requested you to explain the benefits of using the implementation project-based approach over the functional area-based approach.

Which two are the main benefits of using the implementation projects within Functional Setup Manager? (Choose two.)

- A. Implementation Project gives you the flexibility to set up different functional areas of the offering at different times.
- B. Implementation Project helps in assigning responsibility of managing setup data to a broad group of users.
- C. Implementation Project helps you to monitor progress of the setup tasks.
- D. Implementation Project helps you to use the manage setup data entry in bulk option.

Correct Answer: BC

Some of the main benefits of using the implementation projects within Functional Setup Manager are: Implementation Project helps in assigning responsibility of managing setup data to a broad group of users. You can assign tasks to different users who are responsible for entering and validating setup data for different functional areas of the offering. Implementation Project helps you to monitor progress of the setup tasks. You can track the status and completion percentage of each task and view the dependencies and prerequisites among tasks. Implementation Project does not give you the flexibility to set up different functional areas of the offering at different times, as this is determined by the configuration package that you select for your implementation. Implementation Project does not help you to use the manage setup data entry in bulk option, as this is a separate feature that allows you to import and export setup data across instances using spreadsheets. QUESTION 3

Using Oracle Time and Labor, your client wants to put in a validation process that allows only a certain number of maximum hours an employee can charge in a day, and a minimum of hours he or she can report in a week.

What feature would you use to meet this requirement? (Choose the best answer.)

- A. project time validation rules
- B. time calculation rules
- C. time entry rules
- D. time audit rules

Correct Answer: C

To put in a validation process that allows only a certain number of maximum hours an employee can charge in a day, and a minimum of hours he or she can report in a week, you need to use time entry rules. Time entry rules allow you to define the conditions and actions for validating time entries based on various attributes such as hours, dates, projects, tasks, etc. You can also specify the error messages and severity levels for the time entry rules. Reference: [https:// docs. oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-time-and-labor.html#OAPFM2355991](https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-time-and-labor.html#OAPFM2355991)

QUESTION 4

You configure one OTBI using Project Cross Subject Area Analysis Real Time. You notice that all measures (Budget, Forecast, Cost, Commitments, Revenue, and Invoice) are not available for Bill-To-Customer and Contract and Contract Line dimensions. Identify the reason for this behavior. (Choose the best answer.)

- A. The Bill-To-Customer dimension applies only to Invoice measures, but the Contract and Contract Line dimensions do not apply to Revenue and Invoice measures.
- B. The Bill-To-Customer dimension applies only to Revenue and Invoice measures.
- C. The Contract and Contract Line dimensions apply only to Invoice measures.
- D. The Bill-To-Customer dimension applies to Invoice measures, and the Contract and Contract Line dimensions apply to Revenue and Invoice measures.
- E. The Bill-To-Customer dimension does not apply to Invoice measures, but the Contract and Contract Line dimensions apply only to Revenue and Invoice measures.

Correct Answer: D

Ref:https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/faopm/subjectareas.html#Projects__Cross_Subject_Area_Analysis__Re al_Time_SA_20

Analyze real-time information on project performance, including budgets, forecasts, costs, commitments, revenue, and invoices.

This subject area analysis allows cross subject area analysis between Funding, Invoices, Revenue, Budget, forecasts, Costs areas.

QUESTION 5

Stigma consulting has been hired by a client to implement Project Management Cloud. Which role should they assign to a user for using the rapid implementation feature to set up the Project Financial Management offering by populating and uploading a Microsoft Excel workbook?

- A. Project Executive
- B. Project Integration Specialist
- C. Project Administrator
- D. Project Application Administrator

Correct Answer: B

The Project Integration Specialist role should be assigned to a user for using the rapid implementation feature to set up the Project Financial Management offering by populating and uploading a Microsoft Excel workbook. This role allows the

user to access the Functional Setup Manager and perform the common setups for project costing and billing using predefined templates and spreadsheets. The user can also monitor and validate the setup data using reports and dashboards.
