QUESTION 1

Select two correct statements about project classifications on a template. (Choose two.)

- A. Set Code is not required for a project class category in a project classification.
- B. Project Classification is a mandatory field on a project template.
- C. When a project is created from a template, the required project classifications must be entered.
- D. Project class category in a project classification must be associated with a Set Code.

Correct Answer: CD

Project classifications are used to group and report on projects based on different criteria. A project template can have one or more project classifications, which can be either required or optional. When a project is created from a template, the required project classifications must be entered, while the optional ones can be left blank. A project class category in a project classification must be associated with a set code, which determines the list of values for the project class. Project classification is not a mandatory field on a project template, but it is recommended to use it for reporting purposes. QUESTION 2

You want to export your project plan to Oracle Project Financial Management Cloud after initial scheduling is complete in Microsoft Projects. Identify three conditions that must be met for exporting milestone tasks. (Choose three.)

- A. only one labor resource assignment with 100 effort
- B. lowest-level tasks set up with non-zero duration
- C. lowest-level tasks set up with zero duration
- D. only one labor resource assignment with 0 effort
- E. percent work complete values of 0 or 100 percent

Correct Answer: CDE

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapex/define-project-management-configuration.html#OAPEX1357147> Topic-Microsoft Project Prevalidation: Explained The following table describes Prevalidation

rules for tasks and resource assignments.

Level

Rule

Lowest-level tasks

One labor and multiple expense resources are allowed for a lowest-level task. Remove other resources.

Summary tasks

Only one labor resource with zero allocation is allowed for a summary task. Remove all other resources.

Milestone tasks

No subtasks are allowed under milestone tasks. Milestones must be lowest-level tasks.

Milestone tasks

Milestone tasks must have zero duration.

Milestone tasks

Only one labor resource, with zero effort, is allowed for a milestone task. Remove all other resources.

When exporting milestone tasks, ensure that the tasks:

Are lowest-levels task with zero duration, that is, the same start and finish dates. Have only one labor resource assignment with zero effort. Have percent work complete values of 0 or 100 percent. Any other values are set to zero before

export.

QUESTION 3

Your client organization has recently undergone a restructuring exercise that has resulted in the creation of new jobs. The Resource Breakdown Structure (RBS) was previously created with existing jobs, and now the new jobs have been added to the existing Resource Breakdown Structure.

Identify the correct statement about the RBS and new resources. (Choose the best answer.)

- A. If the "Allow resource changes at project level" option is set to No, the new resources and resource formats that are added to a Planning Resource Breakdown Structure for one project are not available for other projects.
- B. If the "Allow resource changes at project level" option is set to No for the RBS, then the resources added to the Planning Resource Breakdown Structure are automatically available for use on the projects.
- C. If the "Allow resource changes at project level" option is set to Yes for the RBS, the new resources are available automatically at project level.
- D. If the "Allow resource changes at project level" option is enabled for the RBS, the new resources added at project level are automatically reflected in the RBS.

Correct Answer: B

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/fapfm/implementing-project-financial-management-applications.html#FAPFM969761>

Topic-Entering Planning Resource Breakdown Structure Details Click Navigator > Setup and Maintenance, and search for the Manage Planning and Billing Resource Breakdown Structures task.

Click the Manage Planning and Billing Resource Breakdown Structures link. Use the Manage Planning and Billing Resource Breakdown Structures page to create new planning resource breakdown structures and to review existing planning

and billing resource breakdown structures.

Click the Create icon in the Planning Resource Breakdown Structures section. Use the Create Planning Resource Breakdown Structure: Basic Information page to provide basic resource breakdown structure information including the name,

active dates, and project unit.

Enter a planning resource breakdown structure name and select a date from which the resource breakdown structure is available for use. Optionally, provide a description and a date to which the planning resource breakdown structure is

available for use.

Select a project unit. Only projects created for the selected project unit can use this planning resource breakdown structure.

If you want to allow project managers to add planning resources at the project level, then select the Allow resource changes at project level check box. Tip: Changes at the project level don't move back to the parent planning resource

breakdown structure. Deselect this option to ensure all project using the planning resource breakdown structure use the same resources.

Optionally, select a Job Set as a source of jobs for creating planning resources on your planning resource breakdown structure.

Click Save.

QUESTION 4

Green House Corporation has decided to enable the budgetary control feature for their projects. At which two levels will they be able to enter the amounts in the budget versions for these projects?

(Choose two.)

- A. Expenditure Type
- B. Task
- C. Top resource
- D. Expenditure Category E. Project

Correct Answer: BE

Budgetary control is a feature that allows you to monitor and control project costs against approved budgets. You can enter the amounts in the budget versions for these projects at two levels: Task and Project. These levels correspond to the budgetary control levels that are defined for the project type. You can also view and compare the budget amounts and actual costs at these levels using reports and dashboards. Expenditure Type, Top Resource, and Expenditure Category are not levels at which you can enter the amounts in the budget versions for these projects. These are attributes that can be used to group and filter the budget and actual amounts for reporting purposes. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-budgets-and-forecasts.html#OAPFM2356191>

QUESTION 5

You are trying to create a custom infolet but are not able to find the "Create Infolet" option in the Infolet repository window. Which two steps should be completed before you can access the "Create Infolet" option?

- A. You must activate Page Composer.
- B. You should be on the Project Custom Objects page.
- C. You must be in an active sandbox.
- D. You should enable the "Create Infolet" option from the Personalize Springboard page.

Correct Answer: AC
