QUESTION 1

Which feature do you activate in Oracle Identity Cloud Service so that users can use their Microsoft Active Directory passwords to sign in to access resources that are protected by Oracle Identity Cloud Service?

A. The Import utility

B. The bridge

C. Identity Provider

D. Delegated Authentication

Correct Answer: D

QUESTION 2

You are the system administrator using the Management Cloud Dashboard to monitor your production environments. One of your global applications is yellow and upon further investigation on that application, it was identified that one of the users appears to be logging in to the application from multiple distant locations minutes apart. This appears to be a security threat.

Which remediation rule should be configured to address this type of incident?

A. Configure an Identity Cloud Service remediation rule to lock user accounts that log into the application from different locations that occur within a minute of each attempt.

B. Configure an Identity Cloud Service remediation rule to lock all the users accounts.

C. Configure a notification to the user to have them reset their password.

D. Disable all connectivity to the application from the suspicious region.

Correct Answer: A

QUESTION 3

Which two are the main differentiators of Oracle Identity Cloud Service NOT supported by first- generation Identity-as-a-Service (IDaaS) vendors? (Choose two.)

A. It implements OAuth by default for easy integration with Oracle CASB Cloud Service and Oracle Security Monitoring and Analytics Cloud Service.

B. It provides the ability to manage the life cycle of identities on hybrid environments.

C. It provides support for multiple Software-as-a-Service (SaaS) vendors.

D. It provides support for Open Standard.

Correct Answer: AD

QUESTION 4

Which Identity SOC Cloud Service supports auto-access to the configurations in dynamic application environments?

A. Oracle Orchestration Cloud Service

B. Oracle Configuration and Compliance Cloud Service

C. Oracle Identity Cloud Service

D. Oracle Log Analytics Cloud Service

Correct Answer: C

QUESTION 5

Which three are the main goals of Oracle Identity Security Operations Center (SOC) Framework? (Choose three.)

A. fast and easy deployment of on-premises services through a centralized console

B. a single pane of glass to manage security threats across their on-premises and cloud environments

C. the ability to monitor heterogeneous environments

D. a suite of integrated solutions that work together, and not have to manage multiple solutions

E. the ability to integrate different services through open standards

Correct Answer: ABD
