QUESTION 1

What is the correct way to access data from Fusion Apps in your AppUI extension?

A. Use a service from the service catalog.

B. Define a new service endpoint providing the direct service URL.

C. Establish a JDBC connection to the Oracle Fusion Apps database.

Correct Answer: A

The correct way to access data from Fusion Apps in your AppUI extension is to use a service from the service catalog. The service catalog is a list of predefined service connections that are available for your AppUI extension. These service connections allow you to access and manipulate data from Fusion Apps using REST APIs. You can browse the service catalog and select the service that matches your data needs. References: : Service Catalog in Visual Builder Studio : Accessing Data from Fusion Apps in Visual Builder Studio

QUESTION 2

You are looking to create a Foldout layout in a page emulating the one in Oracle Fusion Cloud Apps.

How will you do it?

A. Use JavaScript code to animate the various panels on your page.

B. Use a welcome template and add the foldout template inside it.

C. Use the horizontal Foldout page template pattern.

Correct Answer: C

The easiest way to create a Foldout layout in a page emulating the one in Oracle Fusion Cloud Apps is to use the horizontal Foldout page template pattern. This is a predefined pattern that provides a horizontal fold animation for pages with multiple panels of data. You can drag and drop this pattern from the Components palette in Visual Builder Studio and configure it according to your needs. References: : Horizontal Foldout Page Template Pattern in Redwood Pattern Book : Horizontal Fold Animation in Visual Builder

QUESTION 3

What is the function of the Publish button in the Visual Builder Studio workspace editor?

A. To deploy a test version of your AgpUI extension

B. To push changes to Git, and also start a merge request

C. To deploy the sandbox that your AgpUI extension is associated with

D. To start the CI/CD package and deploy pipeline for the current extension

Correct Answer: B

The Publish button in the Visual Builder Studio workspace editor allows you to push your changes to the Git repository and also start a merge request. A merge request is a way of proposing changes from one branch to another branch in Git. It helps you to review and collaborate on your code before merging it into the main branch . References: : Working with Git in Visual Builder Studio : Merge Requests in Visual Builder Studio

QUESTION 4

How many instances of Oracle Visual Builder Studio are provisioned with your Oracle Fusion Cloud Applications Tenancy?

A. Multiple - for each DEV instance in your tenancy

B. None - you need to provision one manually

C. One - mapped to your production Fusion Apps instance

D. One - mapped to a TEST instance of Fusion Apps in your tenancy

Correct Answer: C

When you subscribe to Oracle Fusion Cloud Applications, you get one instance of Oracle Visual Builder Studio provisioned with your Oracle Fusion Cloud Applications Tenancy.This instance is mapped to your production Fusion Apps

instance and allows you to create and deploy extensions for your Fusion Apps pages. You can also use this instance to access other instances of Fusion Apps in your tenancy by creating sandboxes for them .

Working with Sandboxes in Visual Builder Studio

QUESTION 5

Jim has been working on some changes in a workspace but the project manager wants Tammy to continue the work Jim did. How can they achieve this?

A. Jim can change ownership of the existing workspace.

B. Jim needs to first commit and push his changes to the central Git branch for Tammy to create a new workspace.

C. Tammy can create a new workspace based on Jim\\'s workspace.

Correct Answer: C

The best way to achieve this is to have Tammy create a new workspace based on Jim\\'s workspace. A workspace is a private copy of the code that you can work on without affecting other developers. You can create a new workspace from an existing one by selecting the option "Create Workspace From" in Visual Builder Studio. This will copy allthe changes from the source workspace to the new one, allowing Tammy to continue the work Jim did.
