QUESTION 1

Which two (2) design considerations will have the most impact on the efficiency and performance of the Microsoft SQL Server when an administrator is planning an IT Management Suite 8.5 implementation? (Select two.)

- A. Hard drive configuration
- B. Internet Information Services (IIS) configuration
- C. Microsoft operating system version
- D. Microsoft SQL Server version
- E. Memory management

Correct Answer: CD

QUESTION 2

A large organization wants to stagger the installation of software updates with computers in different organizational groups by installing the updates on different days.

How can an administrator accomplish this without continually creating separate software update policies that target the different organizational groups?

- A. Configure Site Management settings so that each organizational group downloads the software update installation files from a different package server
- B. Create clones of the Default Software Update Plug-in Policy and modify the target in each policy
- C. Configure an automation policy that periodically disables the Software Update Plug-in by organizational group
- D. Create clones of the Windows Patch Remediation Settings and modify the target in each policy

Correct Answer: A

QUESTION 3

What is the maximum number of computers that could be adequately managed for an "on- box" installation of the Microsoft SQL Server with Notification Server

- A. 10,000
- B. 7,500
- C. 12,500
- D. 5,000

Correct Answer: D

QUESTION 4

How can an administrator quickly view and export report results while creating a filter based on the location of computers?

- A. Executing the Filter Results Report Builder
- B. Executing Assets by Location Organizational View Builder
- C. Executing and saving the IT Analytics Computers by Location Report Builder
- D. Executing the Computers by Location Report Builder

Correct Answer: A

QUESTION 5

Which criteria in the Patch Remediation Center indicates that a software bulletin has completely downloaded?

- A. The number in the Applicable column equals the number in the Not Installed column
- B. The number in the updates column equals the number in the Available column
- C. The bulletin is marked as ready to install in the Patch remediation Center
- D. The severity of the bulletin has changed to unclassified

Correct Answer: B
