QUESTION 1

Using the "crashed" schedule, if you start Activity 2002 on August 12, 2001, what is the finish date for Activity 2002?

- A. 09-28-01.
- B. 09-08-01.
- C. 09-15-01.
- D. 09-18-01.

Correct Answer: B

QUESTION 2

Why does activity 1001 have two successor activities?

- A. Because the late finish of 1001 and the late start of 7001 require two successors
- B. Because the problem could not effectively work with only one successor
- C. Because there are two defined logic paths for the work
- D. Because the duration of activities 2001, 2002 and 200.f require two successors

Correct Answer: C

QUESTION 3

As a change to the network for the current update, activity 6002 is required to begin ten days after the beginning of activity 6001. Which is the simplest logic organization?

- A. A start-to-start relationship with a ten-day lag assigned to activity 6001; activity 6002 will be dependent on activity 6001
- B. A start-to-start to relationship for both activities 6001 and 6002 with a ten-day lag assigned to activity 6002.
- C. A start-to-finish relationship with both activities 6001 and 6002 having a ten-day lag
- D. A finish-to-start relationship with a ten-day lag assigned to activity 6002; activity 6001 will be dependent on activity 6002

Correct Answer: D

QUESTION 4

Total float is defined as the amount of time an activity can be delayed without impacting

- A. The overall project completion
- B. The buoyancy of a successor activity
- C. The next activity
- D. The end of that activity

Correct Answer: A

QUESTION 5

Assuming a total of 30 lifts per crane per day, what is the maximum number of lifts that could be accomplished using 3 small tower cranes over a 5-day period?

Small Tower Crane

Typical capacity for a Small Crane

Maximum Load 5 tons

Minimum Load 1.5 tons

Operation	Time (in minutes)
Sling Up	5
Hoist Up	4
Discharge	3
Clear Unload Area	3
Hoist Down	2

- A. 450 lifts
- B. 300 lifts
- C. 45 lifts
- D. 150 lifts

Correct Answer: A
