QUESTION 1

Review the following table.

product_id	name	price
1	Blueberries	2.63
2	Apple	0.78
3	Orange	0.30

Given the following options are in MySQL, which option correctly alters the last row on the table?

- A. INSERT price = 0.9 INTO product WHERE product_id = 3;
- B. MODIFY product UPDATE price = 0.9 WHERE product_id = 3;
- C. SET product (price) VALUES (0.9) WHERE product_id = 3;
- D. UPDATE product SET price = 0.9 WHERE product_id = 3;

Correct Answer: D

QUESTION 2

You have data from two unrelated tables. Which Appian objects can easily relate data from these two tables?

- A. Process Models
- B. Expression Rules
- C. Custom Data Types
- D. Record Types

Correct Answer: D

When creating a Record Type, you can define relationships to other Record Types, which enables you to link data from two or more unrelated tables. This is typically done by creating a foreign key field in the Record Type that references the primary key of another Record Type.

QUESTION 3

What is a way to start a process from an interface?

- A. Start Process Smart Service

- B. Process Start Event
- C. Process Messaging
- D. Start Process Link

Correct Answer: D

QUESTION 4

You are using local variables defined in `a!localVariables()`.

Based on the default refresh behavior, when will the variable refresh?

- A. Variables are refreshed when introduced in `a!forEach()`.
- B. Variables are refreshed on every interaction.
- C. Variables are refreshed when any referenced variables are changed.
- D. Variables are refreshed once the form is submitted.

Correct Answer: C

By default, all variables defined within the `a!localVariables` function refresh when a referenced variable in the value configuration changes. You can change these refresh behaviors using the `a!refreshVariable` function. These configurations are only available within an interface; they are ignored when used in an expression outside of an interface.

QUESTION 5

A feature is being deployed to the test environment.

In which environment is unit testing performed for the feature?

- A. Upgrade
- B. Development
- C. Production
- D. Staging

Correct Answer: D
