QUESTION 1

You are implementing several flows in Apigee Edge and realize that there is common functionality used across many different APIs and flows You want to use Apigee Edge to minimize the number of releases What should you do?

A. Use a Shared Flow and a Flow Callout where needed.

B. Use Proxy Chaining and a Service Callout where needed

C. Use a template build process to compose flows from flow fragments.

D. Use a Shared Flow and Flow Hooks to enforce all APIs call the shared flow

Correct Answer: A

QUESTION 2

You have a new set of requirements for a mobile app. The product team tells you that the user data already exists from the website version of the app. The user APIs are currently internal access only. The product team has asked for the following.

1.

The app requires user authentication before data should be accessed.

2.

The app needs to display user data once the user has logged into the mobile app.

3.

The app needs to allow changes to user data once the user has logged into the mobile app.

Choose three development tasks that would accomplish the requirements. Choose 3 answers

A. Create an Oauth 2 0 Service Account API proxy

B. Create an Oauth 2.0 Password Grant Type API proxy

C. Create an Oauth 2.0 Client Credential Flow Grant Type API proxy

D. Create a new API proxy for a GET /v1/customers/{customerid}

E. Create a new API proxy for a PUT/v1/customers/{customerid}
