QUESTION 1

When creating a role in IBM Tivoli Endpoint Manager Web Reports, what is the function of Restrict View with a Filter?

A. It constrains what the role can view.

B. It provides an unrestricted view of all objects.

C. It provides a drop-down list of available targets to the user.

D. It allows users in the role to restrict what they can view by creating a filter.

Correct Answer: A

QUESTION 2

An IBM Tivoli Endpoint Manager V8.1 (TEM) deployment will utilize Message Level Encryption (MLE). Which basic workflow must be executed to enable and maintain encryption?

A. Enable MLE via the TEM Administration Tool and establish top level decryption relays as needed.

B. The only requirement is to establish a policy within the TEM Console to set the TEM Agent Settings for encrypting reports.

C. Generate the encryption key from the TEM Console and then establish a policy to set the TEM Agent Settings for encrypting reports.

D. Generate the encryption key using the TEM Administration Tool. Then using the TEM Console, establish a policy to set the TEM Agent Settings for encrypting reports.

Correct Answer: D

QUESTION 3

Which statement is true about manually editing computer settings for fail-over relays?

A. The primary relay cannot be a UNIX relay.

B. Primary or secondary relays do not have to be set for an agent to function.

C. Only the primary and secondary relays can be set; no other levels can be specified.

D. The secondary relay should always be in the same affiliation group as the primary relay.

Correct Answer: B

QUESTION 4

IBM Tivoli Endpoint Manager V8.1 (TEM) is being deployed in a highly distributed environment, and there are many

remote locations with very slow WAN links back to a company\\'s headquarters. How should relays be deployed to avoid excessive WAN traffic?

A. Use a single relay in each remote location and use bandwidth throttling set to maximum.

B. Use redundant relays in each remote location to ensure that Agents have a fail-over relay.

C. Use a single relay in each remote location because multiple relays will congest the WAN connection.

D. Use redundant relays at headquarters to ensure remote location WAN connections are not congested.

Correct Answer: B

QUESTION 5

What are three requirements for an endpoint to be used as a relay? (Choose three)

A. Java V1.4.2 or higher

B. minimum free hard drive space: 2 GB

C. Firefox V2.0 or above (for UNIX relays)

D. a two-way TCP connection to its parent

E. a two-way UDP connection to its parent

F. Internet Explorer V4.0 or above (for Windows relays)

Correct Answer: BDF
