QUESTION 1

How do you enable streaming mode for a process chain?

- A. Navigate to Process Chain Maintenance (RSPC). Select Streaming Mode in the process chain attributes.
- B. Navigate to Customizing (SPRO). Change the general settings for SAP BW/4HANA.
- C. Navigate to Modeling DW Workbench (RSA1). Activate streaming mode on the Current Settings Folder tab.
- D. Navigate to Process Chain Maintenance (RSPC). Add a new process variant for streaming mode.

Correct Answer: A

QUESTION 2

How can you persist data from any SAP HANA database table to a table in the SAP BW schema? Note: There are 3 correct answers to this question.

- A. Create an Open ODS view.
- B. Consume the view using a CompositeProvider.
- C. Create an SAP HANA calculation view.
- D. Consume the view using a CompositeProvider.
- E. Create an Open ODS view. Generate a data flow.
- F. Create a DataSource.
- G. Load the data to a DataStore object (advanced).

Correct Answer: EFG

QUESTION 3

Which condition must you ensure if you want to replicate data based on a view with SAP Landscape Transformation Replication Server?

- A. View-based data result sets must be kept persistent first until data replication can take place.
- B. An SAP HANA source system must be defined to consume the view.
- C. Each table of the view requires a defined trigger to enable data replication.
- D. One table as part of the view has to be defined as primary table and is used to trigger data replication.

Correct Answer: B

QUESTION 4

Which advantages does the SAP Lumira template for generic analysis provide? Note: There are 2 correct answers to this question.

- A. You can create a bookmark to a navigation state and link it on any Web page.
- B. You can use Visual Basic for Applications to improve the design.
- C. You can compare two DataSources in one report.
- D. You can use it for any BW query or SAP HANA calculation view.

Correct Answer: AD

QUESTION 5

How do you model plant-specific attributes for the characteristic material?

- A. Compound the material and the plant.
- B. Define navigation attributes for the characteristic material.
- C. Define time-dependent attributes for the characteristic material.
- D. Join the material and the plant.

Correct Answer: A
