QUESTION 1

You connect SAP GUI for Windows front ends to an SAP system using a WAN (Wide Area Network) connection. Which of the following do you need to consider regarding network bandwidth? There are 3 correct answers to this question.

A. The amount of data transferred from the database to the application server

B. The volume of "non-SAP-related" traffic (for example, office documents) using the same connection

C. Using SAP\\'s advanced online data compression technology (SAP ODCT) to minimize the network load

D. The number of dialog steps being processed using this line

E. Activating the "Low speed connection" indicator for remote connections

Correct Answer: BDE

QUESTION 2

What does SAP recommend when importing transport requests? (There are 3 correct answers to this question)

A. Transport requests should only be imported if the software component vector of the transport requests fit to the software components and their Support Package level of the target system.

B. Transport requests should be imported into the productive system one by one in the order of their sequence in the import queue

C. Transport requests should always be imported into the productive system in the sequence of their export from the development system

D. In general importing transport requests into the productive systems requires a maintenance window (downtime window).

E. Transport requests should be imported project wise into the productive system

Correct Answer: ADE

QUESTION 3

SAP offers a vast range of products for companies of all sizes. Which of the following are SAP offerings? There are 4 correct answers to this question.

A. SAP Business All-in-One

B. SAP Business One-for-All

C. SAP Business ByEvolution

D. SAP Business One

E. SAP Business ByDesign

F. SAP Business Suite

Correct Answer: ADEF

QUESTION 4

What request types can be handled by the Internet Communication Manager (ICM)? There are 3 correct answers to this question

A. RFC requests from or to the ABAP stack

B. SMTP requests from or to the ABAP stack

C. HTTP requests for the SAP integrated ITS

D. HTTP requests for the Java stack in case of a dual stack system

E. Enqueue requests from or to the ABAP stack

Correct Answer: BCD

QUESTION 5

You want to establish the connection between the user management of an AS ABAPbased SAP system and a Directory Server via LDAP. Which of the following configuration steps do you have to perform in the SAP system? There are 3 correct answers to this question.

A. In transaction LDAP (Directory Service Connection), maintain host name, port number, and product name of the Directory Server.

B. In transaction LDAP (Directory Service Connection), provide logon credentials (user and password) in the SAP system which are then used to log on to the Directory Server.

C. In transaction SM59 (Configuration of RFC Connections), create an RFC connection of type "T" from the SAP system to the LDAP connector.

D. In transaction SICF (Maintain Services), activate the ICF service used for the communication between the SAP system and the Directory Server.

E. In transaction SU01 (User Maintenance), create an SAP user (type "system") that is used by the Directory Server to connect to the SAP system.

Correct Answer: ABC
