### QUESTION 1

Which block storage device protocol achieves the optimal cost-effective balance between I/O performance and high storage capacity for midrange storage applications?

- A. SAS
- B. NVMe
- C. SATA
- D. SSD

Correct Answer: A

---

### QUESTION 2

When should FCIP be used to interconnect FC SANs?

- A. to converge FC and IP traffic onto a single network transport within a distance of 200 km
- B. to interconnect local and remote FC SANs at distances within 200 km
- C. to converge FC and IP traffic onto a single network transport at distances greater than 200 km
- D. to interconnect local and remote FC SANs at distances greater than 200 km

Correct Answer: D

---

### QUESTION 3

What is a function of the metadata service in an OSD storage system?

- A. Generates an object ID from the data to be stored
- B. Manages the file system storage space for all remote clients
- C. Generates the file system namespace from the data to be stored
- D. Manages physical OSD containers on which data is stored

Correct Answer: A

---

#### QUESTION 4

What is a key function of the orchestration layer in a modern data center architecture?

- A. Provides a unified view to manage the resources across the data centers
- B. Enables automatic updates of offerings listed in the service catalog with pre-defined workflows
- C. Allows automated arrangement, coordination, and management of resource provisioning
- D. Interacts directly with physical components across layers to begin provisioning

Correct Answer: C

---

#### QUESTION 5

Which standard provides lossless transport to an FCoE Ethernet network?

- A. Data Center Bridging Capability Exchange
- B. Priority-based Flow Control
- C. Remote Direct Memory Access
- D. Data Center Bridging

Correct Answer: D
