QUESTION 1

Which of the following BEST illustrates the role of a launch coordination engineer?

- A. A server engineer who is focused on rolling out a dynamically scaled application hosting environment
- B. A software developer focused on building an efficient application startup and shutdown performance
- C. A software engineer who acts as a consultant and liaison between the parties involved in a launch
- D. A site reliability engineer who is focused on stabilizing manual tuning and event monitoring activities

Correct Answer: C

QUESTION 2

Which of the following BEST defines a service level indicator (SLI)?

- A. A subjective measure of the consequences if the level of service is not achieved
- B. A subjective assessment of the performance aspects of the level of service required
- C. A quantitative target value for aspects of the level of service that are provided
- D. A quantitative measure of some aspect of the level of service that is provided

Correct Answer: D

QUESTION 3

Which of the following BEST identifies a desired objective of the production readiness review (PRR)?

- A. To ensure the service is ready for an SRE team to take over support and care for it
- B. To improve the reliability of the service in the development and testing environment
- C. To validate the service meets international quality standards and frameworks
- D. To ensure the service owner transitions operational accountability to the SRE team

Correct Answer: C

QUESTION 4

Which of the following BEST describes the engineering side of SRE?

- A. Applying network and infrastructure development best practices for stable operations and good reliability
- B. Applying network design and deploying best practices to achieve meeting operational performance targets

- C. Applying infrastructure engineering principles to build and maintain the stable delivery of operational services
- D. Applying software development best practices to solving operational problems and automating solutions

Correct Answer: D

QUESTION 5
