QUESTION 1

HOTSPOT

An integrator needs to re-deploy a specific firmware component to one of the Synergy compute nodes.

Click on the option that will allow an integrator to rewrite existing firmware components with the same option.

Hot Area:

Firmware

Firmware baseline

Force installation

Consistency checking

Installation Method

- Firmware and OS Drivers using Smart Update Tools
- Firmware only using Smart Update Tools
- Firmware only

Activate firmware Immediately At a scheduled date and time Not scheduled

Correct Answer:

Firmware

Firmware baseline

Force installation

Consistency checking

Installation Method

- Firmware and OS Drivers using Smart Update Tools
- Firmware only using Smart Update Tools
- Firmware only

Activate firmware Immediately At a scheduled date and time Not scheduled

**QUESTION 2**

What is the purpose of the OmniStack Accelerator card installed in HPE SimpliVity platform?

- A. It performs inline data efficiency processing and deduplication
- B. It provides very fast SSD capacity for demanding workloads
- C. It provides graphic acceleration for VDI infrastructure
- D. It accelerates CPU processing within a virtual machine

Correct Answer: B

QUESTION 3

A customer tries to revert a data volume located on the HPE 3PAR array to a specific snapshot that was taken using HPE Composer, but the process fails. What must an integrator do to fix this problem?

- A. Install the snapshot agent on the operating system to enable online snapshot operations
- B. Select the "Force" checkbox to ignore the warning, and revert to the snapshot because this is a data volume
- C. Navigate to the SSMC and revert to the snapshot using HPE 3PAR tools
- D. Disconnect the volume from the server, then revert to the snapshot and reconnect back to the server

Correct Answer: C

QUESTION 4

A customer needs to deploy HPE Global Dashboard appliance, but experienced vCenter Server failure and cannot access ESXi servers. How can the customer connect to the specific ESXi server to power on important virtual machines?

- A. Login directly to the ESXi system using an embedded Host Client
- B. Use HPE Composer to restart key vCenter Server services remotely
- C. Login to the vCenter Server on port 5480, which is used for backup vCenter Server and is deployed automatically
- D. Login to the Web Client, which is independent from the vCenter Server and provides basic management features

Correct Answer: A

QUESTION 5

A customer has a five-frame Synergy deployment with redundant Composers. An integrator needs to install Image Streamer. What must the integrator consider before taking the planned action?

- A. Image Streamer requires the use of the MGMT port from both of the FLMs in the frame where the Image Streamer appliance is installed
- B. The frame where the Image Streamer is being installed must not contain an Interconnect Module
- C. The location of the Image Streamer must be manually modified through the Composer
- D. A connection to the management network must be established to an FLM in the same frame that houses the Image Streamer

Correct Answer: D
