QUESTION 1

An integration team follows MuleSoft's recommended approach to full lifecycle API development

Which activity should this team perform during the API implementation phase?

- A. Use the API specification to build the MuleSoft application
- B. Design the API specification
- C. Validate the API specification
- D. Use the API specification to monitor the MuleSoft application

Correct Answer: A

MuleSoft recommends a full lifecycle API development approach which includes several phases such as design, implementation, testing, deployment, and management. During the API implementation phase, the primary activity is to use the

API specification to build the MuleSoft application.

QUESTION 2

According to MuleSoft, what is a major distinguishing characteristic of an application network in relation to the integration of systems, data, and devices?

- A. It uses a well-organized monolithic approach with standards
- B. It is built for change and self-service
- C. It leverages well-accepted internet standards like HTTP and JSON
- D. It uses CI/CD automation for real-time project delivery

Correct Answer: B

An application network, as envisioned by MuleSoft, is designed to be dynamic and self-service, enabling rapid adaptation to changing business needs.

MuleSoft Documentation: Application Networks

API-led Connectivity: MuleSoft API-led Connectivity

QUESTION 3

According to MuleSoft which deployment characteristic applies to a microservices application architecture?

- A. Core business capabilities are encapsulated in a single deployable application
- B. A deployment to enhance one capability requires a redeployment of all capabilities
- C. All services of an application can be deployed together as single Java WAR file
- D. Services exist as independent deployment artifacts and can be scaled independently of other services

Correct Answer: D

Microservices architecture is designed to enhance flexibility, scalability, and maintainability by decomposing applications into small, independent services.

Microservices Architecture: What are Microservices? Benefits of Microservices: Microservices Characteristics

QUESTION 4

What are two reasons why a typical MuleSoft customer favors a MuleSoft-hosted AnypointPlatform runtime plane over a customer-hosted runtime for its Mule application deployments? (Choose two.)

- A. Reduced time-to-market for the first application
- B. Reduced application latency
- C. Reduced IT operations effort
- D. increased application isolation
- E. Increased application throughput

Correct Answer: AC

Choosing a MuleSoft-hosted Anypoint Platform runtime plane offers several advantages, particularly in terms of deployment efficiency and operational management.

References:

MuleSoft Documentation: Anypoint Platform Deployment Models Benefits of MuleSoft-Hosted Runtime: CloudHub Advantages

QUESTION 5

Which AnypointPlatform component helps integration developers discover and share reusable APIs, connectors and templates\?

- A. Anypoint Exchange
- B. Design Center

C. API Manager

D. Anypoint Studio

Correct Answer: A

Anypoint Exchange is a component of the Anypoint Platform that helps integration developers discover and share reusable APIs, connectors, and templates.

References:

MuleSoft Documentation: Anypoint Exchange

Anypoint Platform Features: Discover and Share with Exchange
