QUESTION 1

Which AnypointPlatform component helps integration developers discover and share reusable APIs, connectors and templates\\'?

A. Anypoint Exchange

B. Design Center

C. API Manager

D. Anypoint Studio

Correct Answer: A

Anypoint Exchange is a component of the Anypoint Platform that helps integration developers discover and share reusable APIs, connectors, and templates.

References:

MuleSoft Documentation: Anypoint Exchange

Anypoint Platform Features: Discover and Share with Exchange

QUESTION 2

A Kubernetes controller automatically adds another pod replica to the resource pool in response to increased application load

Which scalability option is the controller implementing?

A. Horizontal

B. Down

C. Diagonal

D. Vertical

Correct Answer: A

Kubernetes offers several scalability options to handle varying application loads. The scenario described involves adding another pod replica in response to increased load, which is a form of horizontal scaling.

QUESTION 3

An organization is choosing between API-led connectivity and other integration approaches

Latest MULESOFT-INTEGRATION-ASSOCIATE Dumps | MULESOFT-INTEGRATION-ASSOCIATE PDF Dumps | MULESOFT-INTEGRATION-ASSOCIATE Practice Test

3 / 5

According to MuleSoft which business benefit is associated with an API-led connectivity approach using Anypoint Platform?

A. Higher outcome repeatability through centralized development

B. Greater project predictability through tight coupling of systems

C. Improved security through adoption of monolithic architectures

D. Increased developer productivity through self-service of API assets

Correct Answer: D

API-led connectivity is an approach that emphasizes the reuse of APIs to enhance agility and productivity.

API-led Connectivity: MuleSoft API-led Connectivity Business Benefits: Why API-led Connectivity?

QUESTION 4

An organization\\\'s IT team must secure all of the internal APIs within an integration solution by using an API proxy to apply required authentication and authorization policies

Which integration technology, when used for its intended purpose should the team choose to meet these requirements if all other relevant factors are equal?

A. Integration Platform-as-a-Service (iPaaS)

B. API Management (APIM)

C. Robotic Process Automation (RPA)

D. Electronic Data Interchange (EDI)

Correct Answer: B

Securing internal APIs within an integration solution is critical for protecting sensitive data and ensuring proper access controls. The use of API proxies to apply authentication and authorization policies is a best practice in API security.

MuleSoft Documentation: API Security

API Management Overview: What is API Management

QUESTION 5

According to the National Institute of Standards and Technology (NIST) which cloud computing deployment model describes a composition of two or more distinct clouds that support data and application portability?

A. Public cloud

B. Private cloud

C. Community cloud

D. Hybrid cloud

Correct Answer: D

According to the National Institute of Standards and Technology (NIST), a hybrid cloud is a cloud computing deployment model that consists of a combination of two or more distinct cloud infrastructures (private, community, or public) that

remain unique entities but are bound together by standardized or proprietary technology that enables data and application portability.
