### QUESTION 1

Which of the following would a network administrator configure to set NTP settings for a specific subnet within DHCP?

- A. Reservation
- B. Lease time
- C. Scope options
- D. Exclusion range

Correct Answer: C

---

### QUESTION 2

Users are connected to a switch on an Ethernet interface of a campus router. The service provider is connected to the serial 1 interface on the router. The output of the interfaces is: E1/0: 192.168.8.1/24 S1: 192.168.7.252/30

After router and device configurations are applied, internet access is not possible. Which of the following is the most likely cause?

- A. The Ethernet interface was configured with an incorrect IP address.
- B. The router was configured with an incorrect loopback address.
- C. The router was configured with an incorrect default gateway.
- D. The serial interface was configured with the incorrect subnet mask.

Correct Answer: D

---

### QUESTION 3

A user is unable to navigate to a website because the provided URL is not resolving to the correct IP address. Other users are able to navigate to the intended website without issue. Which of the following is most likely causing this issue?

- A. Hosts file
- B. Self-signed certificate
- C. Nameserver record
- D. IP helper ANS

Correct Answer: A

Role of the Hosts File:

[uk.co.certification.simulator.questionpool.PList@5a62cfc0](https://www.geekcert.com/n10-009.html) Common Issues with the Hosts File:

Why Other Options are Less Likely:

Troubleshooting Steps:

#### QUESTION 5

Which of the following protocols has a default administrative distance value of 90?

- A. RIP
- B. EIGRP
- C. OSPF
- D. BGP

Correct Answer: B

EIGRP (Enhanced Interior Gateway Routing Protocol) has a default administrative distance (AD) value of 90 for internal routes. The administrative distance is used to rate the trustworthiness of routing information received from different routing protocols. EIGRP, developed by Cisco, has an AD of 90, which is lower than that of RIP (120) and OSPF (110), making it more preferred if multiple protocols provide a route to the same destination.
