QUESTION 1

An administrator needs to upgrade AOS for an air gapped cluster by using Prism Element.

Which two actions allow the administrator to perform the upgrade? Choose Two

A. Extract the AOS binaries to the CVM

B. Manually Upload Binaries to a local http server

C. Manually Upload AOS binaries and metadata

D. Use the LCM dark site Option Providing AOS Binaries

Correct Answer: CD

QUESTION 2

An organization runs several core business applications on a Nutanix cluster. System stability and support are critical for these applications, which has an annual maintenance window.

How can the administrator assure that these requirements are met?

A. Purchase Mission Critical support.

B. Purchase Ultimate licensing.

C. Adhere to the STS release cycle.

D. Adhere to the LTS release cycle.

Correct Answer: D

To assure system stability and support for critical applications running on a Nutanix cluster, the administrator can adhere to the LTS (Long Term Support) release cycle. LTS releases provide stability and long-term support, with a focus on maintenance and bug fixes rather than new features. This can help ensure that the system remains stable and supported during the annual maintenance window

QUESTION 3

An administrator wants to have a single chart with the logical usage for three storage containers. Which action should the administrator perform?

A. Create a new Metric Chart

B. See Storage usage under Prism Element Health page

C. Create a new Entity Chart

D. See Usage Summary in the Storage Containers detailed view

Correct Answer: C

An administrator can create an Entity Chart to view the logical usage for multiple storage containers in one chart. This chart can be created from the Prism Element dashboard, and it provides a visual representation of the logical usage of each container, allowing administrators to easily compare the usage of multiple containers at once.

QUESTION 4

An Administrator has recieved the following critical alert:

Node 192.168.148.172 is marked to be detached from metadata the administrator has opened a case with Nutanix and the support engineer has requested more information about the error.

which two action should the administrator take in the health check dashboard to collect the requested

information? choose two

A. Open A remote support tunnel

B. Run Logbay

C. Create an entity chart

D. Run Nutanix cluster check

Correct Answer: BD

QUESTION 5

An administrator has received the following critical alert:

Node 192.168.148.172 is marked to be detached from metadata The administrator has opened a case with Nutanix and the support engineer has requested more information about the error. Which two actions should the administrator take in the Health Check dashboard to collect the requested information? (Choose two.)

A. Create an Entity chart

B. Open a remote support tunnel.

C. Run the Log Collector

D. Run the Nutanix Cluster Check

Correct Answer: CD
