QUESTION 1

An administrator created a header and footer global policy package and assigned it to an ADOM. What are two outcomes from this action? (Choose two.)

A. You must manually move the header and footer policies after the policy assignment.

B. After you assign the global policy package to an ADOM, the policy package is hidden from the ADOM and cannot be viewed.

C. If you assign an additional global policy package to the same ADOM, FortiManaqer removes previously assigned policies.

D. You can edit or delete all the global objects in the global ADOM.

Correct Answer: AD

QUESTION 2

Refer to the exhibit.

An administrator is about to add the FortiGate device to FortiManager using the discovery process FortiManager is operating behind a NAT device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings

What is the expected result?

A. During discovery FortiManager sets trie FortiManager NATed IP address on FortiGate

B. During discovery FortiManager sets both tie FortiManager NATed IP address and NAT device IP address on FortiGate

C. During discovery FortiManager sets the NATed device IP address on FortiGate

D. During discovery FortiManager uses only the FortiGate serial number to establish the connection

Correct Answer: C

QUESTION 3

When an installation is performed from FortiManager, what is the recovery logic used between FortiManager and FortiGate for an FGFM tunnel?

A. After 15 minutes, FortiGate will unset all CLI commands that were part of the installation that caused the tunnel to go down.

B. FortiManager will revert and install a previous configuration revision on the managed FortiGate.

C. FortiGate will reject the CLI commands that will cause the tunnel to go down.

D. FortiManager will not push the CLI commands as a part of the installation that will cause the tunnel to go down.

Correct Answer: A

The configuration change will break the fgfm connection, causing the FortiGate unit to attempt to reconnect for 900 seconds. If the FortiGate cannot reconnect, it will rollback to its previous configuration.

QUESTION 4

An administrator is replacing a device on FortiManager by running the following command:

execute device replace sn .

What device name and serial number must the administrator use?

A. Device name and serial number of the original device.

B. Device name and serial number of the replacement device.

C. Device name of the replacement device and serial number of the original device.

D. Device name of the original device and serial number of the replacement device.

Correct Answer: D

QUESTION 5

Which of the following statements are true regarding VPN Manager? (Choose three.)

A. VPN Manager must be enabled on a per ADOM basis.

B. VPN Manager automatically adds newly-registered devices to a VPN community.

C. VPN Manager can install common IPsec VPN settings on multiple FortiGate devices at the same time.

D. Common IPsec settings need to be configured only once in a VPN Community for all managed gateways.

E. VPN Manager automatically creates all the necessary firewall policies for traffic to be tunneled by IPsec.

Correct Answer: ACD
