#### QUESTION 1

Complete the following statement with the correct sentence : "The objective of organizational agility is to dramatically reduce the time and effort required to fulfill new or changed business requirements..."

- A. as long as the business requirements doesn't change too often."
- B. once legacy integration has been broadly achieved."
- C. once a collection of mature agnostic services is available."
- D. as long as the organization can continually outsource its IT projects."

Correct Answer: C

---

#### QUESTION 2

XML and XML Schema are examples of:

- A. custom design standards commonly used by service-oriented solutions
- B. custom design characteristics commonly found in service-oriented solutions
- C. industry standards commonly used by service-oriented solutions
- D. industry characteristics commonly found in service-oriented solutions

Correct Answer: C

---

#### QUESTION 3

Two common, yet opposing SOA delivery approaches are:

- A. bottom-up and upside-down
- B. top-down and left-to-right
- C. upside-down and left-to-right
- D. none of the above

Correct Answer: D

---

#### QUESTION 4

When designing service-oriented architectures, it is important to take the strategic goal of Increased Vendor Diversity Options into account, because this goal:

- A. encourages you to commit to one vendor platform and stick with that platform, which fosters long-term flexibility

B. encourages you to retain the constant option of using proprietary vendor features and extensions so that they can be entrenched into your service-oriented architectures for long-term flexibility

C. encourages you to retain the constant option to extend or replace parts of your service-oriented architectures with different vendor technologies or products, which fosters long-term flexibility

D. encourages you to bridge disparity between vendor platforms by using modern transformation technologies for long-term flexibility

Correct Answer: C

---

#### QUESTION 5

Why is it recommended to establish a service-oriented architectural model that is vendor-neutral?

A. Because a vendor-neutral architectural model provides you with the opportunity to fully leverage and form dependencies on proprietary (vendor-specific) vendor features.

B. Because a vendor-neutral architectural model provides you with the opportunity to build service-oriented solutions only with open source technologies, thereby avoiding the use of vendor technologies altogether.

C. Because a vendor-neutral architectural model provides you with the freedom to diversify its implementation by leveraging multiple vendor technologies as required.

D. A vendor-neutral service-oriented architectural model is not recommended.

Correct Answer: C
